QUALITY, DURABILITY, LONGEVITY

A Beachcomber HEATSHIELD™ is a crucial element that keeps your hot tub insulated. It creates a positive vacuum seal that traps in moisture and heat. A HEATSHIELD™ rapidly pays for itself in saved energy costs by way of increased energy efficiency.

UL-CERTIFIED

Every Beachcomber HEATSHIELD™ is UL-certified, regularly and independently tested to meet or exceed static load testing of the ASTM standard performance specifications. These are the highest benchmarks available to govern the integrity, quality, and safety of your hot tub cover. Look for the ULC logo and accept nothing less for your Beachcomber Hot Tub.

WE'VE GOT YOU COVERED! QUALITY GUARANTEED

The Beachcomber HEATSHIELD™ ensures first class quality in its design and construction and carries a 2 year Guarantee from manufacturer defects. Every Beachcomber HEATSHIELD™ is built with the greatest care and attention and will help you maintain premium hot tub performance. They are developed by experts using the finest materials and parts, and tested and manufactured according to the highest quality standards. A Beachcomber HEATSHIELD™ is reliable, energy efficient and ensures you get the most out of your Beachcomber Hot Tub.

1. HIGHLY DURABLE 26 OZ MARINE-GRADE VINYL SKIN

Specially treated to be moisture, mildew and UV-ray resistant to ensure protection and longevity in any climate or environment. In addition, bonded poly-thread stitching and marine-grade corrosion-proof zippers ensure all seams withstand long-term use. The HEATSHIELD™ hinge fold is furthermore reinforced by triple stitched laminate to provide extra cover lifter support.

2. MARINE STRENGTH REINFORCED HANDLES

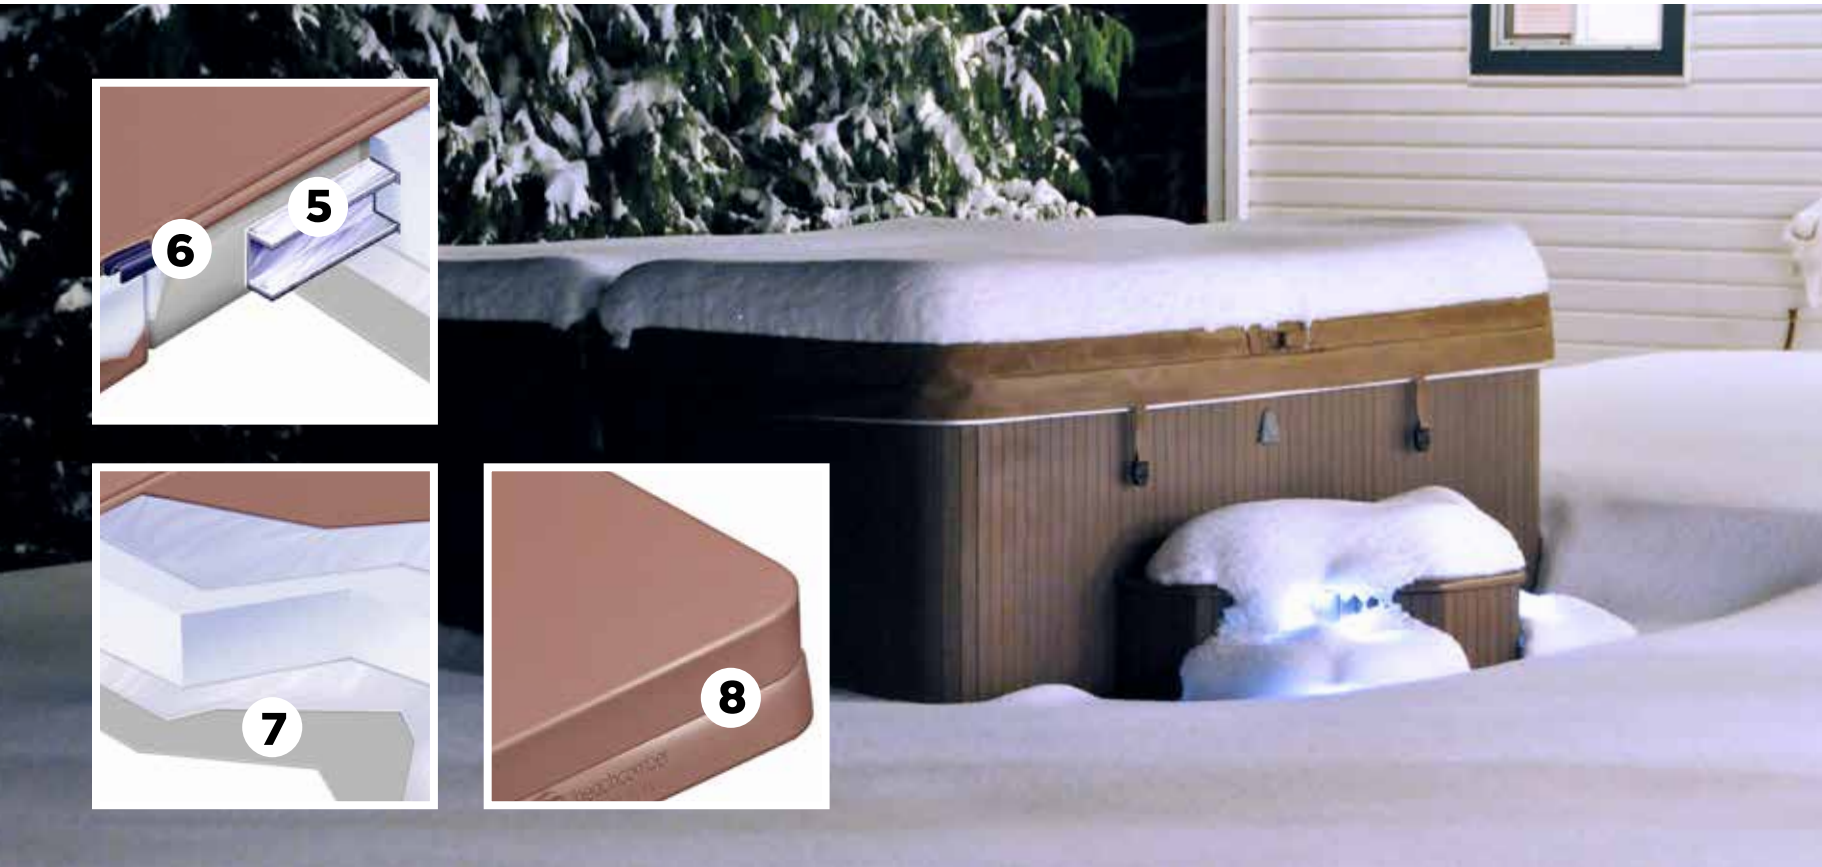

Colour-matched twin access marine strength 8" handles are hand sewn into the main seam structure with quintuple stitched reinforcement to provide maximum strength and durability.

3. TAPERED SLOPE DESIGN

A sensible and effective 4" - 3" tapered and beveled design allows rain and moisture drainage. This style of construction prevents water pooling and water absorption while maintaining lightweight and maneuverability.

4. HIGH DENSITY HEAT-SEALED FOAM CORE INSULATION

Precisely constructed with fully encapsulated high-density foam that provides superior insulation value (up to R14.14 per inch), compressive strength and moisture resistance. It is vacuum and heat sealed in a 6mm poly-envelope moisture barrier to further maximize heat retention and HEATSHIELD™ longevity. Each foam inner has trimmed corners at a 6-inch radius to securely seal each corner for a snug fit.

5. 20 GAUGE ALUMINUM REINFORCED CENTRE SUPPORT RIB

Lightweight, extra strength and corrosion proof C-Channels to ensure the structural integrity for the life of the hot tub cover under all conditions, even under the weight of snow load.

6. CONTINUOUS HEAT BUMPER SEAL

The Heat Bumper Seal is a continuous nylon web-reinforced compression barrier that is pinched between both sides of the cover to prevent heat loss and lock in steam. Beachcomber's attention to detail is personified in this little known step in HEATSHIELD™ construction. The Heat Bumper Seal is further capped at each end with compression caps called Steam Sealers™, further preventing heat loss and maximizing the energy efficiency of your Beachcomber Hot Tub.

7. 15OZ LAMINATED KREVLON™ INTERIOR LINER

This laminated double ply Krevlon™ barrier is on the underside of the HEATSHIELD™ and is moisture and mildew resistant. It acts as a vapour barrier for the poly-sealed foam inserts and is also equipped with integrated drain grommets that allow moisture to drain away and not get trapped while maintaining optimal strength and durability.

8. VACUUM SEAL TOP LIP DESIGN

A sealed barrier between the lip of the hot tub and the hot tub cover prevents entry or exit of air or moisture, conserving valuable heat. A heavy-duty custom-fitted 10.2 cm perimeter skirt wraps around the entire hot tub to ensure an airtight seal at the lip for maximum energy efficiency, protection against environmental contaminants and to beautify your hot tub when not in use.

Customer Information **Specify the hot tub manufacturer and model**

Name: _____ Manufacturer: _____
Beachcomber replacement only requires model, colour and fold info

Address: _____ Model: _____

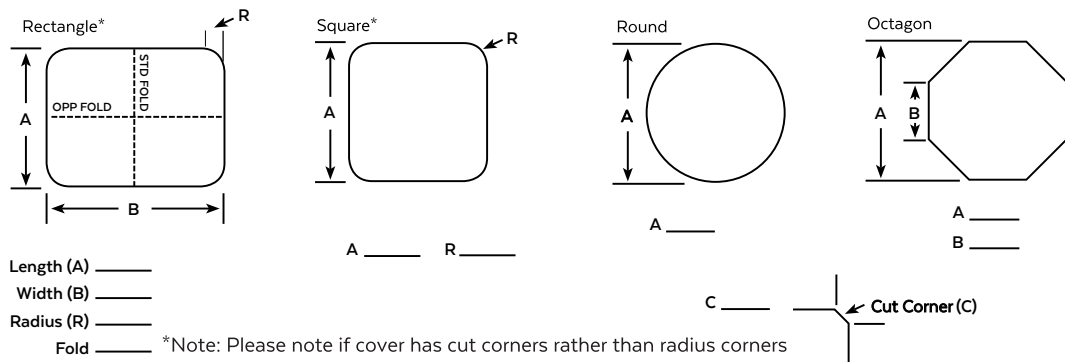

Phone: _____ **Determine strap location for non-Beachcomber Heatshield**

Select colour of durable marine grade vinyl

Tan Steel Jade Blue

Measure the outside dimensions of the hot tub in inches based on the following shapes:

Comments and Special Instructions

HEATSHIELD™ ACCESSORIES

HURRICANE STRAPS (OPTIONAL)

Every HEATSHIELD™ comes with four integrated lockdown straps to prevent entry by pets and young children. An optional colour coded strap to match your HEATSHIELD™ is available to use as a secondary safety measure to ensure your cover stays on your hot tub during wind storms. It can also be utilized as a secondary safety strap to help thwart children or unwanted intruders from entering.

COVER CARE

Keep your HEATSHIELD™ cover clean as often as necessary by washing with mild soap and rinsing with clean water before applying COVER CARE.

COVER CARE is a concentrated, EcoLogo® certified, liquid revitalizer and UV protectant that is ideal for all types of hot tub covers, as well as vinyl products around the home, including patio furniture and vinyl on vehicles.

Warning: never use solvent, alcohol, silicone or petroleum based products, abrasive cleaners, or strong detergents.

LIFT 'N' STORE™ COVER LIFTER

The Original LIFT 'N' STORE™ cover lifter is a simple and convenient way to lift and store your HEATSHIELD™ cover quickly and get it out of the way. This clever cantilever design is affixed to the bottom of the hot tub skirt or to the deck surface on recessed tubs and allows for easy maneuverability and trouble-free use.

- ✓ *Quality anodized aluminum tubing for lightweight, strength, and durability*
- ✓ *Test hot tub water with a kit or strips before entering.*
- ✓ *Affixed to the bottom of the hot tub skirt allows for easy maneuverability*
- ✓ *Utilizes safety chain to prevent over-extension of the lifter*
- ✓ *Requires 24" (61 cm) clearance*
- ✓ *Guaranteed for 2 years*

SLIDE 'N' STORE™ PLUS COVER LIFTER

SLIDE 'N' STORE™ PLUS cover lifter is an affordable solution manufactured to provide quick removal of your HEATSHIELD™ cover with minimum effort while in use. The cradle ensures your HEATSHIELD™ is easily lifted without any undue stress and remains suspended without touching the ground.

- ✓ *Quality anodized aluminum tubing for lightweight, strength, and durability*
- ✓ *Cradle design provides gentle handling of your HEATSHIELD™ cover*
- ✓ *Design utilizes single hydraulic strut and stress-free hinge operation*
- ✓ *Requires 24" (61 cm) clearance*
- ✓ *Effortless 3-step process for easy opening*
- ✓ *Guaranteed for 2 years*

SLIDE 'N' STORE™ EXTREME COVER LIFTER

SLIDE 'N' STORE™ EXTREME cover lifter is designed with a steel plate to utilize weight of the hot tub to secure the cover lifter in place. Built using high-grade aluminum with integral hydraulic pistons for easy lifting and provides simple do-it-yourself installation for square, rectangle, and circular shaped hot tubs.

- ✓ *High-grade powder coated aluminum*
- ✓ *Cradle design provides gentle handling of your HEATSHIELD™ cover*
- ✓ *Integral hydraulic piston for easy on and off cover lifting*
- ✓ *Easy installation by slipping under PERMASEAL™ and utilizing 4 bracing screws*
- ✓ *Requires 34" (87 cm) clearance*
- ✓ *Effortless 3-step process for easy opening*
- ✓ *Guaranteed for 2 years*

AIRLIFT™ COVER LIFTER

AIRLIFT™ cover lifter is engineered with aircraft grade corrosion proof metals, incorporates hydraulic assistance for easy lifting and closing, and provides flexible mounting options for all hot tubs and surroundings.

- ✓ *Corrosion-proof powder coated aircraft grade metal components - no plastics*
- ✓ *Quality gas shock assisted hydraulic springs for easy and light lifting*
- ✓ *Flexible install and mounting options for all sizes of hot tubs, corner radius' and surrounds*
- ✓ *Only requires 9" clearance*
- ✓ *Doesn't catch HEATSHIELD™ skirt when opening and closing*
- ✓ *Utilizes locking pin to protect HEATSHIELD™ cover from blowing over*
- ✓ *2-step process for quick opening*
- ✓ *Guaranteed for 2 years*
